Strong Foundation  
For  
Preschoolers

Specially Planned  
For  
overall  
development

Pictorial Content  
Vivid  
and  
Colourful

The success of every beginning is evaluated by the achievement of its goals. Our goal in this series of books is to lay a strong foundation for the basic education of preschoolers. This Pre-Primary series is specifically planned for the overall development of the students' perception.

Every child ought to know that it is not difficult to colour or draw properly if the basic skills required for the same, are developed at a young age. Drawing and colouring are such activities and skills, that every child enjoys doing. This skill gives the child the freedom to choose his own colours and thus express his ideas and imaginations. It builds the self-confidence, that he too is capable of drawing and colouring. Large pictures are given to enable children to colour properly so that the colour does not spill out. These activities enhance the child's creativity and develop his motor skills.

Most pages of this series carry a small reference, model drawing, which explains the whole technique.
